

SICO 2000 Dual-Height Stage

The Dual-Height / Single Height 2000 series offers all the advantages of a mobile folding stage, plus the added simplicity and speed of built-in height adjustability.

Single Person Set-up:

- Designed to be set-up and taken down by one person resulting in considerable savings in labor and time.

Less Units to be Handled:

- 6' x 8' (183cm x 244cm) stages make for the perfect head table riser. Allows 30" (76cm) for tables, 18" (46cm) for chairs, plus 24" (61cm) for serving space. 4' x 8' (122cm x 244cm) require twice as many units.

- Over-center locking mechanism keeps legs locked into place during transport.

- Each section of a Sico 2000 mobile folding stage rolls freely on its own four casters. No heavy sections to lift and carry, no storage caddies necessary.

- Sico Adaptable Ramps allow the same fast set-up as you have with a Sico portable folding stage.

- Velcro on all four sides of stage make for easy drape attachment. Drapes are adjustable, allowing full deck-to-floor coverage at all heights.

- Unit-to-unit lock for tiered riser or stage set-up guarantees that stages are locked together for safety and security.

- Vinyl coated steel edge banding provides long lasting wear and durability.

- Sico's pin and cable operation allows for easy height adjustment.

Accessories:

- Adjustable step units, ADA ramps, guard rails, guard rail covers, chair/table stops and drapes.

Service:

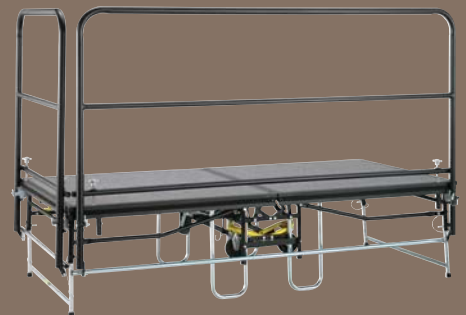

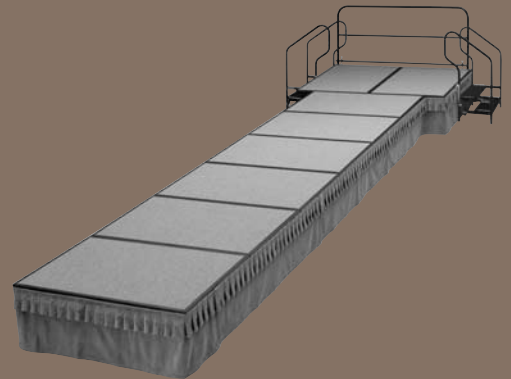

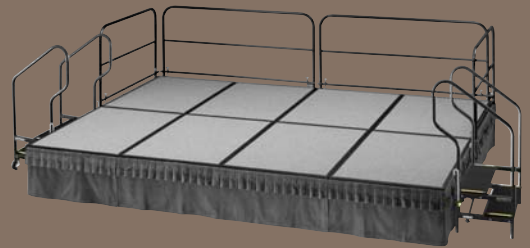

- Sico offers free space analysis drawings, which will provide accurate layouts for your venue with the appropriate number of stages and stage accessories.

Specifications:

- See specifications on page 10.

- Ideal for head table risers, performance stages, fashion runways, speaker's platform and theatre-in-the-round.

- Universal guardrails are used with the 1800 Stage, as well as the Sico Tri-Height stage.
